Source: All data is from Fairtrade International's 2021 Monitoring Data (released in 2023). The 2023 release covers data collected in 2021. Please refer to [Fairtrade International Monitoring Report](#) (page 22) for more information about data sources and methodology. Values may not add up to 100% due to rounding. Produced by Fairtrade for illustrative purposes only.

Fairtrade Flowers Premium Use

Share of Fairtrade Premium expenditure for Flower Farms in Dutch Flower Group supply chain contributing to the UN SDGs

Fairtrade Premium investments made by Flower producers contribute to many of the United Nations Sustainable Development Goals.

- **Goal 8 Decent work and economic growth** includes loans for housing improvements.
- **Goal 4 Quality education** includes funds for scholarships and bursaries.
- **Goal 1 No poverty** includes disaster or emergency payments to workers.
- **Goal 3 Good health and well-being** includes investments in clean water and sanitation.
- Other SDGs include **Goal 11 Sustainable cities and communities** and **Goal 5 Gender equality**.

Source: All data is from Fairtrade International's 2021 Monitoring Data (released in 2023). The 2023 release covers data collected in 2021. Please refer to [Fairtrade International Monitoring Report](https://www.fairtrade.net/issue/sdgs) (page 22) for more information about data sources and methodology. Read more about how Fairtrade contribute to the SDGs <https://www.fairtrade.net/issue/sdgs>. Please refer to <https://www.fairtrade.net/impact/fairtrade-premium-spending-by-sdg> for more details about methodology for mapping Fairtrade Premium Spend categories to the UN Sustainable Development Goals (SDGs). Values may not add up to 100% due to rounding. Produced by Fairtrade for illustrative purposes only.

Notes on data and data sources

- Produced by Fairtrade for illustrative purposes only.
- Calculations for Premium are based on sales volumes reported by licensees in the Fairtrade Connect system and are not verified by the Fairtrade Foundation.
- Premium Generated estimated using the 2022 average Fairtrade premium paid per stem of 0.00856 EUR. Exchange rate of Premium from Euros to Pounds is based on the annual average exchange rate for the given year (Source: [OFX](#)).
- Producer groups are provided by DFG and not verified by Fairtrade.
- Data for number of farmers, hectares of land cultivated, and Premium Use is from the Fairtrade International COD Impact Monitoring Report, collected in 2021 and covering the preceding 12 months. The data has been compiled to the best of our knowledge and is provided for informational purposes only. CODImpact collects impact data from producers during audits. Since not all producer organizations are audited every year, the last available data is used for those organizations that have not been audited in the past year. Some data may be missing for farms that did not report during this time.
- Farmer numbers, areas of cultivation and Fairtrade Premium spend data all represent the overall figures related to the Producer Organisations in the supply chain, and not just the figures specific to DFG sourcing.
- Please refer to <https://www.fairtrade.net/impact/fairtrade-premium-spending-by-sdg> for more details about methodology for mapping Fairtrade Premium Spend categories to the UN Sustainable Development Goals (SDGs).
- 1 football pitch = 0.82 ha.
- Average rose bouquet = 12 stems used.
- Percentages may not sum due to rounding.
- Data quality checks are performed continuously, thus the data presented can change in future reports.
- Please refer to <https://files.fairtrade.net/publications/2021-Fairtrade-monitoring-report-overview-12th-Ed.pdf>, page 22 for more information about data sources and methodology.
- Notes on sharing data further: Please use estimated or approximate when sharing data from this report in communications.
